Tokotachi Super Duality

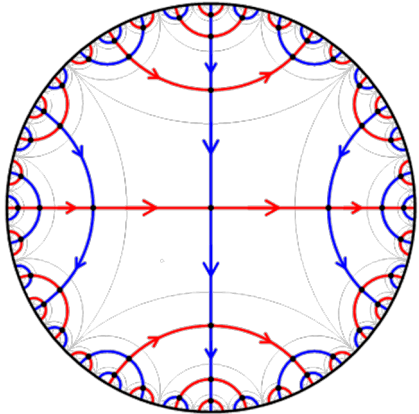

Tokotachi \Rightarrow UrBeginning · Quantum

$$\begin{aligned}
 \text{Futomani} &\otimes Ka \cdot Toki = \text{precursory} \cdot \text{Time} \\
 \text{Futomani} &\otimes Ma \cdot Tokoro = \text{precursory} \cdot \text{Space} \\
 \text{SuperDuality} &\Leftrightarrow \oint Ka \cdot Toki \rightleftharpoons \int Ma \cdot Tokoro \\
 &\oint pre \cdot \text{Time} \rightleftharpoons \int pre \cdot \text{Space}
 \end{aligned}$$

Futomani

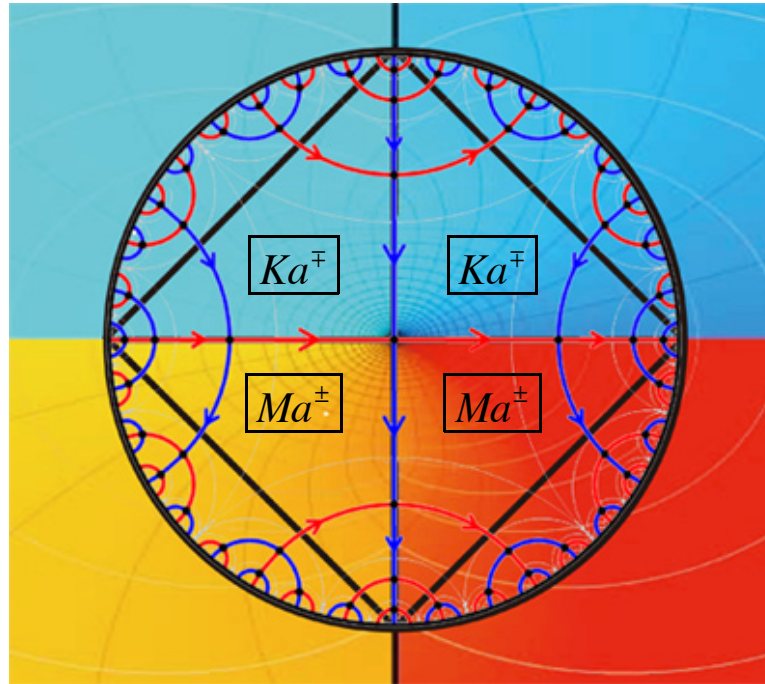

- Axiom.K1 \pm Spontaneous Symmetry Breaking
- Axiom.K2 Mawari Meguri \Leftrightarrow \pm Twister
- Axiom.K3 Nagi-Nami \Leftrightarrow $\pm\partial \Leftrightarrow \pm\oint$
- Axiom.K4 Mukahi \Leftrightarrow \pm Crosslink Tensor

Cayley's graph + Poincare's Disc

The Cayley graph of the free group on two generators (in red and blue), embedded in the Poincaré hyperbolic disk model.

Mathematical Model of Tokotachi : Cayley graph-Poincare's Dyad Disc

First, the Cayley graph-Poincare's Disc and the Futomani scheme are superimposed. Furthermore, the mathematical model of <Tokotachi> was completed by superimposing this mathematical model on the <Four-phase = Toyo = Dyad>.

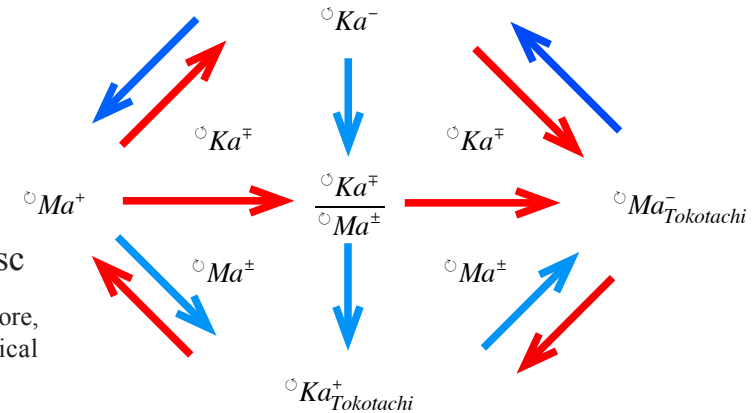

Futomani scheme

The Cayley graph of the free group on two generators **a** and **b** by Wikipedia

Dyad \vee Futomani
